SAKSHAM PANDEY

Frontend Engineer | React | Next.js | TypeScript | TanStack Query | Performance Optimization

Patna, India | +91 95467 48850 | pandeysaksham180@gmail.com | linkedin.com/in/saksham-pandey-184515250 | github.com/sakshampandey380

PROFESSIONAL SUMMARY

Performance-driven Frontend Engineer specializing in React, Next.js, TypeScript with full-stack capability across FastAPI, Node.js, PostgreSQL. Proven track record architecting modular client systems using Feature-Sliced Design (FSD), sub-second caching with TanStack Query, and real-time streaming via WebSockets and WebRTC. Core Web Vitals optimization reducing latency by 64%, building accessible WCAG 2.1 AA design systems. Pursuing Integrated BS-MS in AI & Cybersecurity at IIT Patna.

TECHNICAL SKILLS

- **Frontend Core:** TypeScript, JavaScript (ES6+), React.js, Next.js (App Router), HTML5, CSS3, Tailwind CSS
- **State & Data Layer:** TanStack Query (React Query), Zustand, Redux Toolkit, Context API, Optimistic UI Updates
- **Real-Time & Media:** WebRTC (Peer-to-Peer Data Channels), WebSockets, Canvas API, MediaStream API
- **Backend & Database:** Python (FastAPI), Node.js (Express), RESTful APIs, PostgreSQL, Redis Caching, MySQL
- **DevOps, Cloud & Testing:** Docker, Git, GitHub Actions, CI/CD, Jest, React Testing Library, Vercel, Postman
- **Engineering Practices:** Feature-Sliced Design (FSD), Core Web Vitals (LCP/INP/CLS), WCAG 2.1 AA, Bundle Splitting

PROFESSIONAL EXPERIENCE

Frontend / Full Stack Engineer (Independent Contractor) - Client Projects & Distributed Products | Remote | Jan 2023 - Present

- Architected modular client-side architectures for 6+ production web apps using React, Next.js, TypeScript following Feature-Sliced Design (FSD), reducing cross-module code duplication by 35%
- Implemented aggressive client-side caching and background hydration using TanStack Query, eliminating redundant API roundtrips and slashing dashboard load times from 2.1s to 750ms
- Engineered accessible, high-performance UI component libraries with Tailwind CSS adhering to WCAG 2.1 AA, achieving consistent 98+ Google Lighthouse Accessibility rating
- Constructed zero-flicker optimistic UI updates and real-time WebSocket listeners, boosting perceived speed across data-intensive workflows
- Containerized client-server staging environments using Docker and automated CI pipelines via GitHub Actions, accelerating release cycles by 40%

KEY ENGINEERING PROJECTS

Viora Meet - Real-Time Video Conferencing & Screen Engine | React, TypeScript, WebRTC, WebSocket, FastAPI |
github.com/sakshampandey380/viora_google-meet_copy

- Developed low-latency video conferencing interface using WebRTC peer connections and FastAPI WebSocket signaling, sustaining sub-150ms audio/video latency
- Engineered resilient LAN fallback layer maintaining peer-to-peer data channels across intranet nodes when external WAN connectivity drops
- Optimized media rendering pipelines using Canvas API and CSS GPU acceleration, delivering locked 60 FPS video grid without CPU thermal throttling; implemented ICE reconnection, bandwidth adaptation, stateful mesh chat

ZipHire - High-Throughput ATS Resume Analyzer Platform | React, TypeScript, TanStack Query, FastAPI, PostgreSQL |
github.com/sakshampandey380/resumeai_pro

- Engineered interactive ATS analytics dashboard in React/TypeScript with multi-format file parsing (PDF/DOCX) and vectorized skill-matching telemetry with 94% parsing accuracy
- Designed async file upload queues with chunked multipart processing, visual progress bars, and resilient client-side schema validation
- Reduced client re-renders across dynamic candidate scoring tables by 45% using TanStack Virtual and memoized selectors; built RBAC guards and JWT silent renewal

NexusChat - Low-Latency Event-Driven Messaging Interface | React, TypeScript, Zustand, FastAPI, Redis, MySQL |
github.com/sakshampandey380/Chat_App

- Constructed event-driven chat interface featuring bi-directional WebSocket streams, live typing telemetry, and instant message delivery states
- Architected virtualized scroll lists handling 100k+ messages without UI lag or DOM bloat using windowing algorithms and Redis-backed paginated cursors
- Integrated local-first offline persistence with Zustand and IndexedDB, ensuring zero chat data loss during intermittent reconnections

EDUCATION

Indian Institute of Technology Patna | Integrated BS-MS in Artificial Intelligence and Cybersecurity | 2025 - Present (Expected 2030)
Relevant Coursework: Data Structures & Algorithms, Web Engineering, Distributed Systems, Network Security, Database Management Systems

CERTIFICATIONS & HIGHLIGHTS

- HackerRank: Gold Badge in Problem Solving & Python | Meta Front-End Developer Specialization: Advanced React, State Management, Testing | Languages: English (Proficient), Hindi (Native), Russian (Conversational)
